New Maths GCSE: A9 - Points on a Line

Name:.. Date:.......................................
Which point lies on the line $y = x$?

Correct Answer: A B C D

Explanation:

....

....

....

....

....

....

Which point lies on the line $y = 4$?

Correct Answer: A B C D

Explanation:

....

....

....

....

....

....

Which point lies on the line $y = x + 2$?

Correct Answer: A B C D

Explanation:

....

....

....

....

....

....
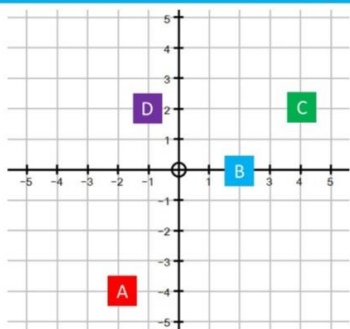

Which point lies on the line $y = 2x$?

Correct Answer: A B C D

Explanation:

....

....

....

....

....
....

Which point lies on the line $y = 3 - x$?

Correct Answer: A B C D

Explanation:

....

....

....

....

....

....
Which point lies on the line $x = -2$?

Correct Answer: A B C D

Explanation:

....

....

....

....

....
....

Which point lies on the line $x + y = 4$?

Correct Answer: A B C D

Explanation:

....

....

....

....

....
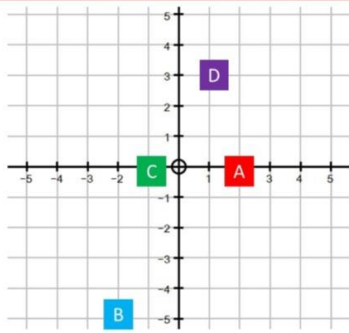

....

Which point lies on the line $y = 2x - 1$?

Correct Answer: A B C D

Explanation:

....

....

....

....

....
....

Which point lies on the line $y = -x$?

Correct Answer: A B C D

Explanation:

....

....

....

....

....
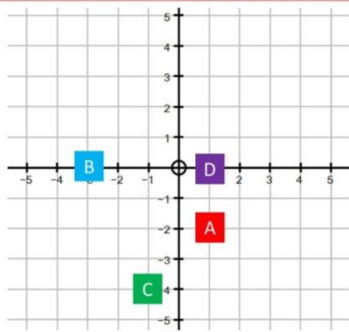

....

Which point lies on the line $y = -3x + 1$?

Correct Answer: A B C D

Explanation:

....

....

....

....

....

....
